

PORTABLE TURNOUT GEAR DRYER – 4 & 6 POSITION

Capacity	4 position 6 position
Dimensions (wxdxh in inches)	4: 57x 32x80 6: 82x33x80
Weight (lbs)	4: 260 6: 290
Electrical Configuration	120v/60 hz
Recommended Breaker	15 amp
Air Flow Total (cfm)	525
Heat (w)	1500

For stations with limited volume or space constraints, the portable dryer allows for quick and efficient deployment in the station or on-scene, bringing drying capabilities to where they are needed. With higher ground clearance than the competition, these units can be moved while loaded. The Port-4 is a mid-size portable dryer that has a capacity of up to 8 pieces of gear and the Port-6 is the largest of the mobile dryer options, offering drying capacity for 12 pieces of gear. With an industry-leading low-decibal reading, we provide dry gear while eliminating the exposure noise in the station. Including ambient and heat settings with every dryer ensures your gear is being dried appropriately.

- Commercial grade construction and powder coated for long-lasting durability to dry gear for years to come
- 4 heavy-duty 5" castor wheels (2 fixed, 2 swivel locking)
- Best in class 65 dBA operation at 6', 55 dBA at 10' allowing for use in close proximity to personnel
